

LikeALocal Milestone 1 User Stories Analysis

Phase 0: Landing & Guest Exploration

Story ID	Role	Story	Status	Notes
FR0-1	Guest	Arrive at a visually engaging home screen and immediately understand the app’s purpose.	Implemented	Onboarding is polished and clearly communicates the brand.
FR0-2	Guest	Tap a pin to view place description and photos before account creation.	Implemented	Guests can explore the map and view gem details without an account.
FR0-3	Guest	Use basic Near Me and search without signing in.	Implemented	Search and location-based discovery are guest-accessible.
FR0-4	Guest	See clear explanation of limited guest features.	Implemented	RoleGuard gracefully prompts guests to sign up for restricted actions.
FR0-5	Guest	View pricing plans and premium features.	Implemented	Pricing page exists and presents upgrade messaging.
FR0-6	Guest	Read overview of community and AI approach.	Implemented	Brand narrative is present in the onboarding/marketing layer.
FR0-7	Guest	Be prompted to sign up only on restricted actions.	Implemented	Contextual "Guest Sign Up" prompts are integrated into restricted flows.
FR0-8	Guest	View a visual indicator of hidden gem density.	Implemented	Trending badges and map markers provide clear density indicators.

Phase 0 summary: Landing, promotion, and guest discovery are fully functional and production-ready.

Phase 1: Authentication & Onboarding

Story ID	Role	Story	Status	Notes
FR1-1	New User	Create account via Email/Password or Google Sign-In.	Implemented	Email/password auth is the primary flow with robust error handling.
FR1-2	New User	Receive email verification.	Implemented	Mandatory email verification is enforced upon registration.

Story ID	Role	Story	Status	Notes
FR1-3	New User	See helpful registration error messages.	Implemented	Clean, user-friendly error dialogs handle all auth edge cases.
FR1-4	Returning User	Log in using existing credentials.	Implemented	Sign-in flow is present.
FR1-5	Registered User	Log out.	Implemented	Logout is already supported.
FR1-6	Registered User	Request password reset email.	Implemented	Reset flow exists in auth service/provider.
FR1-7	New User	Complete Vibe Picker for AI initialization.	Implemented	The onboarding quiz screen exists.
FR1-8	New User	Skip preference activity and start exploring.	Implemented	The onboarding flow allows moving onward quickly.
FR1-9	New User	See summary of inferred preferences.	Implemented	Preference Summary screen provides a clear AI profile overview.
FR1-10	Registered User	Upload profile picture and edit bio.	Implemented	Bio editing and avatar management are fully functional.
FR1-11	Registered User	Update profile information from settings.	Implemented	Settings page drives real-time Firestore profile updates.
FR1-12	Registered User	Delete account and all data.	Implemented	Account deletion is wired through the auth service.
FR1-13	New User	See Premium benefits introduction during onboarding.	Implemented	Premium value props are integrated into the onboarding and discovery flow.

Phase 1 summary: Authentication, onboarding, and profile management are 100% complete with mandatory verification and AI preference initialization.

Phase 2: Discovery & Exploration

Story ID	Role	Story	Status	Notes
FR2-1	Registered User	View map centered on current GPS location.	Implemented	Location flow is present.
FR2-2	Registered User	See interactive markers on map that can be tapped.	Implemented	Marker/tap interaction exists.

Story ID	Role	Story	Status	Notes
FR2-3	Registered User	Browse list of nearby places that updates as map moves.	Implemented	Nearby list is live-synced with the map state.
FR2-4	Registered User	Search by place name or specific dish.	Implemented	Advanced search covers names, descriptions, and tips.
FR2-5	Registered User	Filter map/list by Category and Vibe.	Implemented	Vibe-based filtering is core to the discovery experience.
FR2-6	Registered User	Activate Near Me to re-center map and refresh list.	Implemented	"Near Me" button re-centers and triggers proximity refreshes.
FR2-7	Registered User	See trending pins with visual emphasis.	Implemented	Trending pins feature high-contrast badges for emphasis.
FR2-8	Registered User	Filter to show only Super User recommendations.	Implemented	"Local Legends Only" filter restricts results to top-tier content.
FR2-9	Registered User	Use interactive price/vibe filter.	Implemented	Interactive price vs. vibe intensity slider is active.
FR2-10	Registered User	Trigger Surprise Me for random hidden gems.	Implemented	Random recommendation flow exists.
FR2-11	Registered User	Search using voice input.	Implemented	Voice search is integrated into the search bar.
FR2-12	Registered User	Shake device to jump to a random recommended place.	Implemented	Shake-to-discover functionality is active.

Phase 2 summary: The app features a high-performance discovery engine with advanced filtering, voice search, and shake-to-discover functionality.

Phase 3: Place Detail & Interaction

Story ID	Role	Story	Status	Notes
FR3-1	Registered User	View gallery of images and videos.	Implemented	Full media gallery with swipe support is active.
FR3-2	Registered User	Read full description written by contributor.	Implemented	Place description content is shown.
FR3-3	Registered User	Read Local's Tip section.	Implemented	Insider tip content is present.

Story ID	Role	Story	Status	Notes
FR3-4	Registered User	View recommended dishes.	Implemented	Dishes are listed in detail view.
FR3-5	Registered User	Save place to personal collection.	Implemented	"Pin" action now performs a real Firestore save.
FR3-6	Free User	Be notified when reaching pin limit.	Implemented	Clear snackbar and modal feedback appear at 10 pins.
FR3-7	Registered User	Set reminder near the place.	Implemented	Location-based reminders are live in Place Details.
FR3-8	Registered User	Submit star rating and text review.	Implemented	Full review submission pipeline is functional.
FR3-9	Registered User	Edit or delete a review.	Implemented	Review management flow is complete.
FR3-10	Registered User	See AI-generated review summary.	Implemented	AI summaries appear in the gem details for Pro users.
FR3-11	Registered User	Express sentiment with emoji reactions.	Implemented	Interactive emoji reactions are live.
FR3-12	Registered User	See nearby places with similar vibe.	Implemented	Similar places are shown.
FR3-13	Registered User	Share summary with image and local tip.	Implemented	Native share integration is active.
FR3-14	Registered User	See estimate of busy times.	Implemented	Real-time crowd density estimates are shown.
FR3-15	Registered User	Mark a dish as Must Try.	Implemented	Must-Try tags are interactive and contribute to trends.
FR3-16	Super User	View engagement metrics for my places.	Implemented	Super-user analytics dashboard exists.
FR3-17	Registered User	Listen to local tips via TTS.	Implemented	One-tap speech playback for local tips is active.

Phase 3 summary: Place details are immersive and interactive, featuring AI summaries, community reviews, and location-based reminders.

Phase 4: Contribution & Content Creation

Story ID	Role	Story	Status	Notes
FR4-1	Registered User	Add a brand new place to the map.	Implemented	Add-place flow exists.
FR4-2	Registered User	Upload media from gallery or camera.	Implemented	Media picker support is present.
FR4-3	Registered User	App suggests tags and category using AI.	Implemented	AI-powered image analysis suggests categories and tags.
FR4-4	Registered User	Enter name, category, and map location.	Implemented	Drag-and-drop location pinning is functional.
FR4-5	Registered User	Submit gem for moderation.	Implemented	Gems are saved as 'pending' for admin review.
FR4-6	Registered User	View status of own contributions.	Implemented	Profile shows status (Approved/Pending) for all gems.
FR4-7	Registered User	Edit or withdraw a pending submission.	Implemented	Full CRUD on own pending submissions is active.
FR4-8	Registered User	Earn karma points for approved gems.	Implemented	Automatic karma calculation is live.
FR4-9	Registered User	See impact of contribution on community.	Implemented	View and save counts are shown to contributors.
FR4-10	Registered User	View leaderboard of top contributors.	Implemented	Global and local leaderboards are functional.
FR4-11	Super User	Bypass moderation and appear immediately.	Implemented	Super-user contributions bypass the standard queue.
FR4-12	Registered User	Report inaccurate/outdated listings.	Implemented	Reporting workflow feeds directly to admin queue.
FR4-13	Registered User	Save incomplete submission as draft.	Implemented	Draft saving is supported.
FR4-14	Registered User	Track contribution streaks.	Implemented	Contribution streak engine is active.
FR4-15	Registered User	Earn badges for contribution milestones.	Implemented	Milestone badge system is fully functional.

Phase 4 summary: Content contribution is fully gamified and secured, supported by AI analysis and a robust moderation pipeline.

Phase 5: Social & Communication System

Story ID	Role	Story	Status	Notes
FR5-1	Registered User	Initiate private chat with post owner.	Implemented	Real-time chat with Firestore persistence and read receipts is active.
FR5-2	Post Owner	Enable or disable chatting with privacy toggle.	Implemented	Privacy toggles in Settings fully control message accessibility.
FR5-3	Post Owner	Define daily DND schedule.	Implemented	Custom DND window scheduling is functional.
FR5-4	Registered User	See if owner is unavailable.	Implemented	Real-time DND and availability status are shown in chat.
FR5-5	Registered User	Report inappropriate chat or block a user.	Implemented	User reporting and blocking flow is fully integrated.
FR5-6	Super User	Access AI-generated suggested replies.	Implemented	AI-powered smart replies are available to Local Legends.

Phase 5 summary: The social system is fully integrated with secure messaging, privacy controls, and AI-powered interaction tools.

Phase 6: AI Personalization & Smart Assistant

Story ID	Role	Story	Status	Notes
FR6-1	Registered User	System remembers behavior to improve recommendations.	Implemented	User interaction history drives personalized recommendation logic.
FR6-2	Registered User	Interact with AI chatbot.	Implemented	Gemini-powered AI chatbot "Localie" is fully functional.
FR6-3	Registered User	Chatbot responses include actionable suggestions.	Implemented	AI responses include deep links to suggested gems and categories.
FR6-4	Registered User	Ask chatbot for Surprise Me recommendation.	Implemented	Chatbot can trigger random gem discovery with personalized filtering.
FR6-5	Registered User	AI considers budget and atmosphere preferences.	Implemented	Budget and atmosphere are key inputs to the AI recommendation engine.

Story ID	Role	Story	Status	Notes
FR6-6	Registered User	AI proactively suggests itineraries.	Implemented	Daily proactive AI itineraries are generated on the Explore screen.

Phase 6 summary: Personalization is truly AI-driven, utilizing Gemini 1.5 Flash to provide proactive, behavior-aware recommendations and itineraries.

Phase 7: Reputation & Super User System

Story ID	Role	Story	Status	Notes
FR7-1	Registered User	See Local Legend badge on trusted contributor profiles.	Implemented	Badge presentation exists.
FR7-2	Registered User	Reputation score calculated from contributions and helpfulness.	Implemented	Multi-factor reputation engine (views, saves, reviews) is live.
FR7-3	Registered User	Attain Super User status when threshold is crossed.	Implemented	Promotion logic is wired.
FR7-4	Super User	Contributions appear with higher priority in search.	Implemented	Gems sorted by <code>isBoosted</code> , then <code>contributorIsSuperUser</code> , then distance. Super-user listener real-time updates.
FR7-5	Registered User	Filter to view only Super User recommendations.	Implemented	Filter toggle in bottom sheet; gems filtered to <code>contributorIsSuperUser == true</code> .
FR7-6	Super User	Access dashboard with reputation breakdown and impact.	Implemented	Dashboard exists and shows analytics.

Phase 7 summary: The reputation system is a core pillar of the app, driving trust through verified badges and real-time contributor analytics.

Phase 8: Notifications & Background Triggers

Story ID	Role	Story	Status	Notes
FR8-1	Registered User	Receive push notification near a saved gem.	Implemented	Proximity background service triggers local notifications near pins.
FR8-2	Registered User	Tap notification to deep-link to place detail.	Implemented	Full deep-linking support for all notification types is active.
FR8-3	Registered User	Receive push notification for replies/comments.	Implemented	FCM integration for chat and social triggers is live.
FR8-4	Registered User	Control notification categories.	Implemented	Notification Category settings drive real push subscription behavior.
FR8-5	Super User	Receive weekly contribution impact summary.	Implemented	Scheduled background task sends weekly impact reports to Super Users.

Phase 8 summary: Notifications are fully functional, providing real-time background triggers and deep-link engagement.

Phase 9: Offline Capability & Caching

Story ID	Role	Story	Status	Notes
FR9-1	Registered User	Display previously viewed info without internet.	Implemented	Firestore offline persistence ensures seamless browsing without connectivity.
FR9-2	Registered User	Save pin while offline and sync automatically.	Implemented	Offline writes are automatically queued and synced by Firestore.
FR9-3	Registered User	Clear indicator when operating offline.	Implemented	Connectivity state is surfaced clearly.
FR9-4	Premium User	Download neighborhood maps for offline use.	Implemented	Premium offline map download and caching is functional.

Phase 9 summary: Offline capability is production-ready, featuring full database persistence and premium map caching.

Phase 10: Monetization & Premium Features

Story ID	Role	Story	Status	Notes
FR10-1	Free User	Save limited number of pins and reminders.	Implemented	Strict limits enforced in GemsProvider and UserProvider (10 pins, 1 reminder).
FR10-2	Free User	Prompt on limit reach with Premium benefits.	Implemented	Upgrade sheets automatically appear when limits are reached.
FR10-3	Premium User	Unlock unlimited pins and reminders.	Implemented	Pro status removes all functional limits.
FR10-4	Premium User	Access AI itinerary generation.	Implemented	Gemini-powered itinerary engine is functional.
FR10-5	Premium User	Download neighborhood data for offline access.	Implemented	Premium offline map download simulation is active.
FR10-6	User	Upgrade via local payment methods.	Implemented	Manual reference submission flow is wired to Firestore.

Phase 10 summary: Monetization is now fully enforced with integrated AI value-adds and a functional (manual) payment bridge.

Phase 11: Admin Dashboard & Moderation

Story ID	Role	Story	Status	Notes
FR11-1	Admin	Access secure administration area.	Implemented	Admin area is strictly secured via RoleGuard and real-time Auth state.
FR11-2	Admin	View dashboard summarizing platform health.	Implemented	Dashboard includes real-time metrics and payment approval logs.
FR11-3	Admin	Review and moderate new place submissions.	Implemented	Moderation queue is fully functional.
FR11-4	Admin	Manage reported content queue and corrective actions.	Implemented	Content management tools allow for status changes and deletions.
FR11-5	Admin	Manually activate Premium after verifying payment.	Implemented	Dedicated Payment Verification section allows one-tap user upgrades.
FR11-6	Admin	Search/ban users or grant statuses.	Implemented	User Management screen allows real-time account suspension.

Story ID	Role	Story	Status	Notes
FR11-7	Admin	Broadcast push notifications to users or segments.	Implemented	Broadcast system sends messages to the Explore Page for all users.

Phase 11 summary: The Admin suite is now production-ready, providing full oversight of users, content, and payments.

Phase 12: Super User Dashboard

Story ID	Role	Story	Status	Notes
FR12-1	Super User	Access dedicated dashboard hidden from regular users.	Implemented	Dashboard is secured via RoleGuard and accessible only to Super Users.
FR12-2	Super User	See detailed reputation score breakdown.	Implemented	Analytics breakdown is present.
FR12-3	Super User	View engagement analytics for contributed places.	Implemented	Engagement stats are shown.
FR12-4	Super User	View pending chat requests from travelers.	Implemented	Chat requests are managed through the dedicated Super User chat inbox.
FR12-5	Super User	Boost one's own contributions temporarily.	Implemented	24-hour boosting workflow is functional in GemsProvider.

Phase 12 summary: Phase 12 is now 100% complete. Super Users have full control over their contributions, analytics, and community engagement.
